Gentlemen:

It is respectfully requested that a merit system salary schedule be instituted for assistants in the District Attorney's office. It is believed that such a system would aid in the retention of trained assistants in this office.

In the past two years I have had three first assistants, and within the past two months I have lost three regular assistants. After having served an apprenticeship in the District Attorney's office each has gone on to a much better paying position here in Austin.

I recommend the following:

1. Starting salary for attorney with No experience - $6,000.00.
2. A $50.00 per month increase every 6 months for two years.
3. A $50.00 per month increase for each year over two years.
4. Maximum Salary for assistants - $10,000.00.
5. Maximum Salary for First assistant - $12,000.00.

I sincerely recommend that this merit system for salaries of Assistant District Attorney's be adopted.

Yours very truly,

Tom Blackwell

Gentlemen:

The adoption of the Uniform Commercial Code by the Texas Legislature, effective July 1, 1966, will cause extensive changes in the method and procedure of handling personal property lien registrations in the County Clerks' offices.

Gentlemen:

This is to request that 1966 budget item described as "Reproduction Expense" be amended by increasing the item from $2,250.00 to $5,000.00.

The reason for this requested increase is that the item was set too low when the budget was prepared. At the present time there is less than $200.00 unexpended; it is estimated that an additional $2,800.00 will be needed to complete the year.

Austin, Texas

Dear Mr. Robinson:

In response to our conversation in San Antonio this week, we are glad to forward our offer and proposed Contract to compile your Delinquent Tax Record for the years 1939 to 1965, both inclusive. However, we wish you to know it will be some time before we can begin that work for you. We have a volume of work now under Contract, and in fairness to all, we work the jobs as received in our office in so far as geographically practicable.

We do guarantee; however, in event you give us the job and the Contract is approved by your Commissioners Court, that we will handle it in such a way that all fees and commissions for your office will be released and remain so until such time as we are able to get to the work.

We have signed the Contract form for your convenience, but you are under no obligations. The Contract must be satisfactory to you and to your Commissioners Court.

May we suggest that if the Contract is executed and approved by your Court that you send all four copies to our office. We will get prompt approval by the Comptroller and, after his approval, he will return two copies to you that you may have a copy for your files and a copy to give the Clerk for the Court Record.

We are very pleased in the thought that we may continue to serve you and your County, and trust you may find it so you can give us the necessary time to get to the work.

May you have a full measure of the best in all things.

Sincerely, your friends

Mr. Fritz Robinson
Tax Assessor-Collector
Travis County
Austin, Texas

Dear Mr. Robinson:

We will compile a Delinquent Tax Record for Travis County, Texas, in triplicate, for the years 1939 to 1965, both inclusive, in the manner and form required by law, rulings of the Comptroller of Public Accounts and your suggestions for the price of ten cents ($.10) per item or written line, including lines of footings and recapitulation, shown on the original copy of said record as is provided by Article 7336f Revised Civil Statutes of Texas.

We will furnish all the labor, materials, supplies and equipment necessary to compile the above record without any advance from either you or the county, and accept our compensation as is provided by the statute referred to above. The record will be bound as directed by you. The expense of binding for the two (2) copies of the record delivered to Travis County shall be paid by the county.

The data for the record will be taken from the copy of the delinquent tax records and delinquent tax lists of Travis County on file with the Comptroller of Public Accounts, Austin, Texas. The record will be written on the paper and form prescribed by the Comptroller.

In preparation for the compilation, we will check the credits shown on the original copy of the delinquent tax records and delinquent tax lists of Travis County in the County Tax Office, Austin, Texas, with the credits shown on the copy of said records on file with the Comptroller of Public Accounts, Austin, Texas. We will correctly report errors in credits that proper corrections may be made. This is an audit service not required by law, but a service which we have proven over a long period of years to be necessary in building a dependable record.

We shall be glad to serve you and your county.

Sincerely,

Juanita Law

MEMORANDUM TO:

Mr. N. L. Gault
Commissioner Precinct Two

Dear Sir:

In accordance with your instructions, we have this date checked the plat of the Summit Oaks Section II subdivision as recorded in Book 19, on Page 5, of the plat records of Travis County, Texas; and we also made a site inspection of the construction of the streets in this subdivision.

The plat is in order and the right-of-way widths of the dedicated streets meet the requirements of the Travis County specifications for subdivision roads and streets as recorded in Book 1, on Page 8, of the Commissioners' Court Records.

The construction of all the dedicated streets of this subdivision more than comply with the above noted specifications, with the exception of Sierra Nevada Street. The pavement of this street has some bad spots, which are minor items, but the final construction of the two ends from Sierra Madre Street east and from Sierra Leon Street west to the subdivision limits has not been completed.

It is therefore recommended that the streets of this subdivision, excepting the two half-block ends of Sierra Nevada Street, be accepted for maintenance by Travis County as a part of the road system of Precinct Two.

MEMORANDUM TO:

Mr. Robert E. Barker
Commissioner Precinct Three

Dear Sir:

In accordance with your instructions, we have this date checked the plat and made a site inspection of the construction of the streets in the Palomino Park Section III subdivision as recorded in Book 28 on Page 18 of the Plat Records of Travis County, Texas.

The plat is in order and the right-of-way widths of the dedicated streets complies with the 50' wide minimum requirements of the Travis County specifications for subdivision roads and streets as recorded in Book 1 on Page 8 of the Commissioners' Court Records.

This development was conducted intelligently with good engineering and the construction of the streets in this subdivision more than meets the above mentioned specifications, however, no check was made on the drainage system grades which appear to be adequate.

This is a recently completed subdivision so naturally there are as yet no improvements such as building construction. The county should not obligate itself to spend any tax money for maintenance until development and public usage shall justify such expenditure.

With the proviso noted above, it is therefore recommended that the streets of this subdivision be accepted for maintenance by Travis County as a part of the road system of Precinct Three.

Dear Judge Watson:

We are happy to respond to your request for bids to be opened 10:00 A.M. June 27, 1966 for a complete self-powered aggregate spreader.

We are happy to bid on an Etnyre Self-Propelled Power Spreader, as per your bid request and your specifications. Our machine meets or exceeds all of your specifications except for Item # 14 - Power Train. Our motor is at right angle to the drive axle and drives through a drop transmission box between the engine and the rear axle differential so that the engine can be located high for ease of control, ease of maintenance, and so that it can be close to the drive wheels to give the machine traction. We have 10 forward and reverse speeds, instead of 5 as required, and our spreader gates are held closed by the weight of the material itself. The machine has a self-latching truck latch that does not need the attention of the operator to latch it on to the truck.

The price of our machine with lights, two-wheel brakes and all accessories, with gasoline engine	$15,025.00
Less Discount for Cash	1,706.00
Net F.O.B. Your County Yard	$13,319.00

Commissioners' Court
County of Travis
Austin, Texas

Gentlemen:

As the Engineer for the Owner and as his Representative, we request that the portion of the unimproved road shown in red on the enclosed plat dedicated to the public by Volume 1715, Page 372, of the Deed Records of Travis County, Texas, be vacated.

The reason for this request is that the Austin Independent School District has made arrangements to purchase the 4.74-acre tract on the west side of the road. If this road were vacated, the property on the west could be added to the School's present property on the east side of the road, thus consolidating the land into one tract.

Very truly yours,

Honorable J. H. Watson
County Judge of Travis County

Subject: Alteration of electric line for proposed new highway construction

Dear Judge Watson:

Pedernales Electric Cooperative has received notification of proposed construction on FM Highway No. 1626 from Hays County Line to near intersection FM 2304 at Manchaca. This construction is to be approximately 1.8 miles in length.

Our engineers have made a field survey and prepared sketches and an estimate of the cost to the Cooperative of adjusting its facilities where necessary.

The proposed highway construction involves the rearranging of the Cooperative's facilities in the area. The following units are located on private property and, therefore, are eligible for compensation. Remove one pole, two overhead guys, two down guys, two anchors, and install same.

The estimated cost of adjusting the above facilities is $116.00. The Cooperative is willing to make the above adjustments to their facilities, provided the County advances $116.00, without recourse, to defray a portion of the cost of carrying out this work and on the further condition that the Cooperative at all times shall have complete ownership and control of the entire line and any extensions thereof without any obligation to refund any part of the above payment made by the County.

If this agreement meets the County's approval, please indicate by signing below and returning two copies to this office, along with the County's check payable to Pedernales Electric Cooperative, Inc. in the amount of $116.00.

Please let us know if more detailed data is required or additional information is needed.

Yours very truly,

SEP 12 RECD

Dear Mr. Horton:

From time to time our local Police Department will handle dependent and neglected children in the community initially. As these situations develop our Police Department co-operates by notifying us immediately in order that a child welfare worker from our intake section can assume responsibility for planning.

Very often children are brought to our agency by the Police Department rather than to the Juvenile Court Detention Home. Our social workers later place these children into receiving homes as the case so indicates. In the meantime, very often the children have missed meals, are hungry, or they are in our office at a time when they would normally need some sort of refreshments while plans are being made for them. This is our request for you to release the $50.00 Food Item in our budget to us, thus establishing a petty cash fund to be used for purchase of food and/or refreshments for children when needed.

Sincerely,

W. E. Bowman, Jr.

Mr. N. L. Gault
Commissioner Precinct Two

Dear Sir:

In accordance with your instructions, we have checked the plat records and have inspected the construction of the streets in the North Park Estates subdivision as recorded in Book 28, on Page 16, of the Plat Records of Travis County, Texas, with the findings as stated below.

The plat is in order and the dedicated right-of-way widths of all streets meet the requirements of the Travis County specifications for subdivision roads and streets as recorded in Book 1, on Page 8, of the Commissioners Court Records of Travis County, Texas; and the construction of the streets also meets these same specifications.

It is therefore recommended by this department that the streets of this subdivision be accepted for maintenance by Travis County as a part of the road system of Precinct Two.

Re: Injection Line-TCSL
Throckmorton Regular Field
Throckmorton County, Texas

Gentlemen:

Permission is requested for the laying of a combination 2-3/8" and 2-7/8" injection line from Block 35 (Travis Strawn Field) to Block 38 (Throckmorton Regular Field) Travis County School Land Survey A-254, Throckmorton County, Texas. This is a distance of approximately two and one-half (2-1/2) miles as shown on the attached plat.

In as much as injection is to be for a relatively short duration, three to five years, and small pipe is to be used, we feel that an exposed line will be adequate except where road crossings occur; at which points pipe will be properly buried.

It is understood that Union will be liable for any damage caused by the installation or operation of pipeline.

If the above meets with your approval and permission is granted, please so indicate by your signature in the space provided below, returning the original to the undersigned.

Very truly yours,

Bill Easterly

AN ACT to amend Section 11, Chapter 88, Acts of the Forty-first Legislature, Second Called Session, 1929, as amended by Chapter 161, Acts of the Fifty-second Legislature, Regular Session, 1951, providing for fees of Tax Assessors-Collectors for issuing license receipts and license plates; providing that the Tax Assessor-Collector shall pay the entire expense of issuance of such license receipts and license plates and the cost of postage used in mailing same to applicants; providing a saving clause; repealing all laws in conflict herewith; and declaring an emergency.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 11, Chapter 88, Acts of the Forty-first Legislature, Second Called Session, 1929, as amended by Chapter 161, Acts of the Fifty-second Legislature, Regular Session, 1951, be amended to hereafter read as follows:

"Section 11. CONTRACTUAL AGREEMENT
FOR
RIGHT OF WAY PROCUREMENT
(COUNTY FORM)

STATE OF TEXAS)

COUNTY OF TRAVIS)

COUNTY Travis
PROJECT 8014-1-23
HIGHWAY US 290

This agreement entered into this 31st day of October, 1966, by and between the State of Texas, acting by and through the Texas Highway Department, hereinafter called the State, and Travis County, Texas, acting by and through its duly authorized official under Commissioners Court Order dated 6th day of SEPTEMBER, 1966, hereinafter called the County.

WHEREAS, the State has deemed it necessary to make certain highway improvements on Highway No. US 290 from 1.8 Miles West of Manor to 0.2 Mile East of FM Road 973 ~~KX~~ (except those portions to be acquired by the City of Manor), and which section of highway improvements will necessitate the acquisition of certain right of way, and

WHEREAS, it is agreed that such right of way purchase shall be by joint effort of the State and the County;

NOW, THEREFORE be it AGREED that acquisition of such right of way shall be in accordance with the terms of this contract. The State hereby authorizes and requests the County to proceed with acquisition and the State agrees to reimburse the County for its share of the cost of such right of way providing such acquisition and reimbursement are accomplished according to the provisions outlined herein and agreed to by both parties hereto.

LOCATION SURVEYS AND PREPARATION OF RIGHT OF WAY DATA: The State, without cost to the County, will do the necessary preliminary engineering and title investigation in order to supply to the County the data and instruments necessary to obtain acceptable title to the desired right of way.

DETERMINATION OF RIGHT OF WAY VALUES: The County agrees to make a determination of property values for each right of way parcel by methods acceptable to the County and to submit to the State's District Office a tabulation of the values so determined, signed by the appropriate County representative. Such tabulations shall list the parcel numbers, ownership, acreage, and recommended compensation. Compensation shall be shown in the component parts of land taken, itemization of improvements taken, damages, if any (offset by enhancements, if any,) to the remainder, if any, and the amounts the total compensation will be reduced if the owner retains improvements. This tabulation shall be accompanied by an explanation to support the determined values, together with a copy of information or reports used in arriving at all determined values. Such work will be performed by the County at its expense without cost participation by the State. The State will review the data submitted and may base its reimbursement on the values as determined by this review. The State, however, reserves the right to perform at its own expense any additional investigation deemed necessary, including supplemental appraisal work by State employees or by employment of fee appraisers, all as may be necessary for determination of values to constitute the basis for State reimbursement.

If at any stage of the project development it is determined by mutual agreement between the State and the County that there should be waived the requirement that the County submit to the State property value determinations for any part or all of the required right of way, the County will make appropriate written notice to the State of such waiver, such notice to be acknowledged in writing by the State. In instances of such waiver, the State by its due processes and at its own expense will make a determination of values to constitute the basis for State reimbursement.

NEGOTIATIONS: The State will notify the County as soon as possible as to the State's determination of value. Negotiation and settlement with the property owner will be the responsibility of the County without participation by the State; however, the County will notify the State immediately prior to closing the transaction so that a current title investigation may be made to determine if there has been any change in the title. The County will deliver properly executed deeds which together with any curative instruments found to be necessary as a result of the State's title investigation will properly vest title in the State for each right of way parcel involved. The costs incidental to negotiation and the costs of recording the right of way instruments will be the responsibility of the County. The cost of title investigation will be the responsibility of the State.

CONDEMNATION: Condemnation proceedings will be initiated at a time selected by the County and will be the County's responsibility at its own expense except as hereinafter indicated. The County will obtain from the State, without cost, current title information and engineering data at the time condemnation proceedings are to be initiated. Except as hereinafter set forth, the County will concurrently file condemnation proceedings and a notice of lis pendens for each case in the name of the State, and in each case so filed the judgment of the court will decree title to the property condemned in the name of the State. The County will accomplish the legal procedures and curative matters found to be necessary as a result of the State's title investigation, fulfilling the obligation to properly vest title in the State of Texas. The County may, as set forth herein under "Excess Takings", enter condemnation proceedings in its own name.

COURT COSTS, COSTS OF SPECIAL COMMISSIONERS' HEARINGS AND APPRAISAL EXPENSE: Court costs and costs of Special Commissioners' hearings assessed against the State or County in condemnation proceedings conducted on behalf of the State, and fees incident thereto, will be paid by the County. Such costs and fees, with the exception of recording fees, will be eligible for 50 per cent State reimbursement under the established reimbursement procedure provided such costs and fees are eligible for payment by the State under existing State law. Where the County uses the State's appraisers employed on a fee basis in Special Commissioners' hearings or subsequent appeals, the cost of the appraiser of updating his report, of preparing new reports, preparing for court testimony and appearing in court to testify in support of his appraisal will be paid direct by the County, but will be eligible for 50 per cent State reimbursement under established reimbursement procedure provided prior approval for such appraiser has been obtained from the State. The fee paid the appraiser by the County shall be in accordance with the fee schedule set forth in the appraiser's contract for appraisal services with the State.

EXCESS TAKINGS: In the event the County desires to acquire land in excess of that requested by the State for right of way purposes, the State's cost participation

will be limited to the property needed for right of way purposes. If the County elects to acquire the entire property, including the excess taking, by a single instrument of conveyance or in one eminent domain proceeding, the property involved will be acquired in the name of the County and that portion requested by the State for right of way will be conveyed to the State. When acquired by negotiation, the State's participation will be based on the State's approved value of that part requested for right of way purposes, providing such approved value does not exceed actual payment made by the County. When acquired by condemnation, the State's participation will be in the proportionate part of the final judgment amount computed on the basis of the relationship of the State's approved value to the State's predetermined value for the whole property.

IMPROVEMENTS: Property owners will be afforded an opportunity in the negotiations to retain any or all of their improvements in the right of way taking. In anticipation of the owner desiring to retain his improvements, the State's approved value will include the amounts by which the upper limit of State participation will be reduced for the retention. It is further agreed that the upper limit for the State's participation in the County's cost for an improved parcel will be reduced as shown in the State's approved value where the owner retains an improvement which is to be moved by either the County or the owner. In the event the improvements which are, in whole or part, a part of the right of way taking are not retained by the owner, title is to be secured in the name of the State. The State will participate in the acquisition of a structure severed by the right of way line if the part of the house, building or similar structure outside the right of way cannot be reconstructed adequately or there is nothing but salvage left, provided the State's value is established on this basis and provided title to the entire structure is taken in the name of the State. The State shall dispose of all improvements acquired. The net revenue derived by the State from the disposition of any improvements sold through the Board of Control will be credited to the cost of the right of way procured and shared with the County.

RELOCATION OF UTILITIES: If the required right of way encroaches upon an existing utility located on its own right of way and the proposed highway construction requires the adjustment, removal or relocation of the utility facility, the State will establish the necessity for the utility work. State participation in the cost of making the necessary change, less any resulting increase in the value to the utility and less any salvage value obtainable, may be obtained by either the "actual cost" or "lump sum" procedures. Reimbursement under "actual cost" will be made subsequent to the County's certification that the work has been completed and will be made in an amount equal to 50 per cent of the eligible items of cost as paid to the utility owner. The "lump sum" procedure requires that the State establish the eligibility of the utility work and enter into a three party agreement with the owners of the utility facilities and the County which sets forth the exact lump sum amount of reimbursement based on a prior appraisal. The utility will be reimbursed by the County after proper certification by the utility that the work has been done, said reimbursement to be on the basis of the prior lump sum agreement. The State will reimburse the County in an amount equal to 50 per cent of the firm commitment as paid to the utility owner. The foregoing is subject to the provision that the individual lump sum approved value shall not exceed $20,000, except as specifically approved by the State. In those cases where a single operation is estimated to exceed $20,000, the transaction will be brought to the attention of the State for determination of proper handling based upon the circumstances involved. Such utility firm commitment will be an appropriate item of right of way. The adjustment, removal or relocation of any utility line on publicly owned right of way by sufferance or permit will not be eligible for State reimbursement. The term "utility" under this contract shall include publicly, privately, and cooperatively owned utilities.

FENCING REQUIREMENTS: The County may either pay the property owner for his existing right of way fences based on the value such fences contribute to the part taken and damages for an unfenced condition resulting from the right of way taking, in which case the estimated value of such right of way fences and such damages will be included in the recommended value and the approved value, or the County may do the fencing on the property owner's remaining property.

Where the County performs right of way fencing as a part of the total right of way consideration, neither the value of existing right of way fences nor damages for an unfenced condition will be included in the recommended value or the approved value. State participation in the County's cost of constructing right of way fencing on the property owner's remainder may be based either on the actual cost of the fencing or on a predetermined lump sum amount. The State will be given credit for any salvaged fencing material and will not participate in any overhead costs of the County.

If State participation is to be requested on the lump sum basis, the State and the County will reach an agreement prior to the actual accomplishment of work as to the necessity, eligibility, and a firm commitment as to the cost of the entire fencing work to be performed. The foregoing is subject to the provision that the lump sum approved cost shall not exceed $20,000, except as specifically approved by the State. In case the fencing is estimated to exceed $20,000, the transaction will be brought to the attention of the State for determination of proper handling based upon the circumstances involved.

REIMBURSEMENT: The State will reimburse the County for right of way acquired after the date of this contract in an amount not to exceed 50 per cent of the cost of the right of way acquired in accordance with the terms and provisions of this agreement. The State's reimbursement will be in the amount of 50 per cent of the State's predetermined value of each parcel, or the net cost thereof, whichever is the lesser amount.

If condemnation is necessary and title is taken as set forth herein under the section headed "Condemnation", the participation by the State shall be based on the final judgment, conditioned that the State has been notified in writing prior to the filing of such suit and prompt notice is also given as to all action taken therein. The State shall have the right to become a party to the suit at any time for all purposes, including the right of appeal at any stage of the proceedings. All other items of cost shall be borne by the State and the County as provided by other provisions of this agreement.

If a lump sum fencing or utility adjustment agreement has been executed, the State will reimburse the County in the amount of 50 per cent of the predetermined lump sum cost of the right of way fencing or utility adjustment.

If the County prefers not to execute a lump sum agreement for either fencing or utility adjustments, the State will reimburse on the actual cost of such adjustments. The County's request for reimbursement will be supported by a breakdown of the labor, materials and equipment used.

GENERAL: It is understood that the terms of this agreement shall apply to new right of way authorized and requested by the Texas Highway Department which is needed and not yet dedicated, in use, or previously acquired in the name of the State or County for highway, street, or road purposes. This agreement shall also apply, as to any

existing right of way, to outstanding property interests not previously acquired and to eligible utility adjustments not previously made, as authorized and requested by the Texas Highway Department.

It is understood that this contract shall be effective from and after the date of full execution by the State of Texas.

It is further understood that if unusual circumstances develop in the right of way acquisition which are not clearly covered by the terms of this agreement, such unusual circumstances or problems will be resolved by mutual agreement between the State and the County.

MINUTE ORDER

TRAVIS County

District No. 14

WHEREAS, in the CITY OF AUSTIN, in TRAVIS COUNTY, officials of the City and County did appear before a formal session of the Texas Highway Commission on September 1, 1966, to request the assistance and financial participation of the Texas Highway Department in the development of a controlled-access highway facility along the route of a heretofore proposed City Thoroughfare which has been identified as Missouri Pacific Boulevard, extending from a junction with U. S. Highway 183, north of Austin, and generally along the route of the Missouri Pacific Railroad to West First Street and thence south and southwesterly to a junction with the proposed West Loop (Loop 360) southwest of the City of Austin; and

WHEREAS, the herein described Missouri Pacific Boulevard has heretofore been included as a transportation need in the recently approved Austin Urban Transportation Plan; and

WHEREAS, the City of Austin has heretofore executed an agreement with the Missouri Pacific Railroad for the acquisition of right of way and other considerations from the Railroad, along that portion of the herein described Thoroughfare or Boulevard which would be situated on or adjacent to the Railroad right of way along a section from near Northland Drive to near West First Street, within the above described limits; and

WHEREAS, subsequent engineering studies by the Texas Highway Department have further confirmed the need for an adequate facility to serve the high-volume traffic demands in the corridor now generally traversed by the route of the Missouri Pacific Railroad; and

WHEREAS, such engineering studies have further established the fact that such a facility as described herein must be properly integrated into the existing as well as the planned system of highways and thoroughfares in the CITY OF AUSTIN and TRAVIS COUNTY to provide for the optimum circulation of and service for anticipated traffic demands; and

TRAVIS County

District No. 14

WHEREAS, it has been determined that the provisions for such traffic accommodations would require the ultimate development of appropriate extensions of and connections to the aforementioned Missouri Pacific Boulevard as requested by the City of Austin and described herein; and

WHEREAS, the implementation of planning for such provisions would require the ultimate development of a facility, extending from a connection with FM 1325, at a point north of Austin, and extending thence generally southwesterly, south and again southwesterly along a line that, would be on or adjacent to portions of the existing Missouri Pacific Railroad right of way, from the vicinity of Northland Drive in North Austin to the vicinity of West First Street, near Town Lake, and thence departing from Railroad property and extending south and southwesterly to a connection with U. S. Highway 290, southwest of Austin; and

WHEREAS, having now, by appropriate engineering studies, established the need for such an integrated highway facility as would be required in according due consideration to the aforementioned request by the City of Austin and Travis County; and

WHEREAS, the City and County represent that all other available routes have been investigated and this route has been officially recognized by these agencies as the most feasible and practical route; and

WHEREAS, the City of Austin has offered to furnish at its entire expense all of the right of way plus the adjustment or removal of utilities and other obstructions required for a six-lane traffic facility from U. S. Highway 183 on the north to the South City Limits; and

MINUTE ORDER

TRAVIS County

District No. 14

WHEREAS, the County of Travis has expressed its willingness to furnish any right of way under the State's 50-50 participating plan as might be required for this project other than that furnished by the City; and

WHEREAS, both the City of Austin and the County of Travis recognize the need for control of access to and from the main lanes of such a facility and petition the Texas Highway Department to designate the route as a controlled access facility; and

WHEREAS, due to the restricted width of right of way which will of necessity be limited by prevailing improvements and related costs, it will not be possible to provide flanking frontage roads over a majority of the length of the proposed project; and the construction of a barrier fence must of a necessity be provided for along the right of way line to provide for proper control of access and the protection of pedestrians and adjacent properties.

BE IT RESOLVED, THEREFORE, that the Texas Highway Commission will consider participation in the further planning and financing of construction for such a facility, by sections as may hereafter be agreed upon with the appropriate governmental agencies and as the available funds of the Texas Highway Department may permit, provided:

THE CITY OF AUSTIN WILL:

1. Save harmless the State and defend any suits arising from the transfer of land or right of way to the State and/or use of any land or right of way for highway purposes by the State, such responsibility applying to right of way and/or lands as may be obtained from any and all sources.

TRAVIS County

District No. 14

2. Provide all of the necessary right of way, clear of obstructions, including a minimum width of not less than 62' along each side of the affected portions of the Missouri Pacific Railroad right of way to accommodate a six-lane controlled-access highway of a design which conforms with established design criteria; and, for which pertinent traffic interchanges and grade separations over roads and streets will be provided, as included in those items to be described hereinafter in the enumeration of responsibilities of the Texas Highway Department, from U. S. Highway 183, in North Austin, and extending southerly, as heretofore described herein, to the South City Limits of Austin.

3. Secure all channel easements required for drainage; provide for any channel realignment, modification and concrete riprap required outside the normal right-of-way width, within the limits described in Item 2, above; and, in addition thereto, be responsible for all outfall drainage, outside the normal right of way of the herein described facility.

4. Provide for the removal and/or adjustment of all utilities on, or outside the right of way as may be required, within the limits described in Item 2, above.

5. Be responsible for the relocation, construction and/or reconstruction of connecting city streets.

6. Prohibit access, to or from property abutting the right of way, to the travel lanes and ramps of the proposed facility.

7. Arrange for access of Missouri Pacific Railroad maintenance personnel and equipment in accordance with design arrangements as may be approved by the Texas Highway Department.

MINUTE ORDER

8. Complete, at the entire expense of the City of Austin, the construction of the Railroad separation at 45th Street and at Hancock Drive as may be required in the City's agreement with the Railroad Company.

PROVIDED TRAVIS COUNTY WILL:

1. Participate, on a 50-50 basis with the Texas Highway Department, in the cost of all right of way, including utility adjustments and/or relocations on those portions of the aforementioned and projected limits of the herein described facility as follows:

   a. From F. M. 1325 to U. S. 183, north of Austin.

   b. From the South City Limits of Austin, southwesterly to U. S. Highway 290.

THE TEXAS HIGHWAY DEPARTMENT WILL:

1. Designate a controlled-access highway route from F. M. 1325, north of Austin, southerly in the vicinity of Balcones Drive and the Missouri Pacific Railroad, in and adjacent to the City of Austin, a distance of approximately 14.0 miles, to a connection with U. S. Highway 290 south of Austin, in accordance with an Agreement as may hereafter be executed between the State and the City of Austin.

2. Participate on a 50-50 basis with TRAVIS COUNTY in the cost of right of way and utility adjustments or relocations as may be required on those portions of such a designation, the limits of which are described as follows:

   a. From F. M. 1325 to U. S. 183, north of Austin

   b. From the South City Limits of Austin, southwesterly to U. S. Highway 290

3. Provide for the ultimate construction of a controlled-access type of highway facility, presently estimated to cost approximately $17,600,000.00, by sections as the funds may be available to the Texas Highway Department; and, as may be hereafter agreed upon in an agreement which will be required for execution between the State and the City of Austin, except that an at-grade intersection would be provided at the northern terminus of the facility with F. M. 1325 to permit the appropriate determination of any possible future extension of the herein described facility as may be warranted by a continuation of the Austin Transportation Study.

4. Provisions would be made for the separation and interchanging of traffic over or under and to and from the proposed controlled-access highway facility, heretofore identified as the Missouri Pacific Boulevard, limited to the following major arterial streets or highway facilities for which more specific design provisions are to be recited in an agreement which will ultimately be required for execution between the State and the City of Austin.

Commissioners Court

Gentlemen:

After discussing with the District Judges the need for additional space for offices for the Adult Probation Office, it was concluded that the most logical space to utilize for this purpose would be the spectator section of the little courtroom adjacent to the Adult Probation Office.

It was observed that this courtroom was seldom used, and when used, the trials were of such a nature that large numbers of people were not involved, thus rendering unnecessary the need for the large seating area. It was further noted the Adult Probation Office is ideally located in its present quarters.

It is proposed that we preserve the courtroom for its present function, while making half of the room available for office expansion of the Adult Probation Office.

Therefore, permission is requested to divide the courtroom by partition and construct the needed offices.

Money for this expansion was provided for in the 1966 permanent improvement fund. It has not been spent, and we are asking that this construction be approved to meet the immediate and pressing needs of the Adult Probation Office.

Respectfully submitted,

Giles Garmon

WHEREAS, Travis County acquired at no cost to the State of Texas certain rights of way for the reconstruction of Farm to Market Highway 620 during 1954; and

WHEREAS, it has been determined that the said tract is surplus to the needs for construction or needs for the citizens of Travis County as a road;

ORDER CLOSING A PORTION OF ALBERT ROAD AND
ACCEPTING DEDICATION OF AN EXTENSION OF SHERWOOD ROAD

On this the 9th day of January, 1967, came on to be heard the application of Leonard L. Gentlemen:

Article 47a of the Texas Election Code provides that where the lists of registrants are prepared on electronic data processing machines, the item of information which pertains to the occupation of the registrant may be omitted from the lists of registrants if approval is given by the Commissioner's Court.

Since Travis County is having the registration lists prepared on such machines, and since the space available for information is limited, I am hereby requesting that approval for the omission of this item be granted.

Respectfully yours,

Fritz Robinson
Assessor-Collector of Taxes
Travis County, Texas.

Motion made and seconded that omission of the information pertaining to applicant's occupation be omitted on the voter registeration Blanks. Passed and approved.

Gentlemen:

Among the office machines presently in the office of the Assessor-Collector of Taxes there is an Underwood typewriter with a 26 inch carriage which is approximately twenty-five years old. This machine is not in operation at the present time. It has been repaired many times but we are now unable to get needed parts due to the age of the machine. Recently when a new machine was purchased, we were offered an allowance of two dollars and fifty cents as a trade in allowance on the new machine.

We now have a bid for the purchase of this machine in the amount of twenty-five dollars, and we are asking you to give us permission to dispose of said machine at this price.

Respectfully yours,
